

Item # 04-2800 & 04-2800-11

Installation Instructions for JK 4DR Warrior Pet Divider.

Step One.

Secure the top 2 middle buckles and straps around the top of the cage.

Next, secure the 2 outer straps to the side of the roll bar.

For Installation with a Hard Top, remove hardtop bolt, then insert bolt through the d-ring that is provided with your net, then screw bolt back in place.

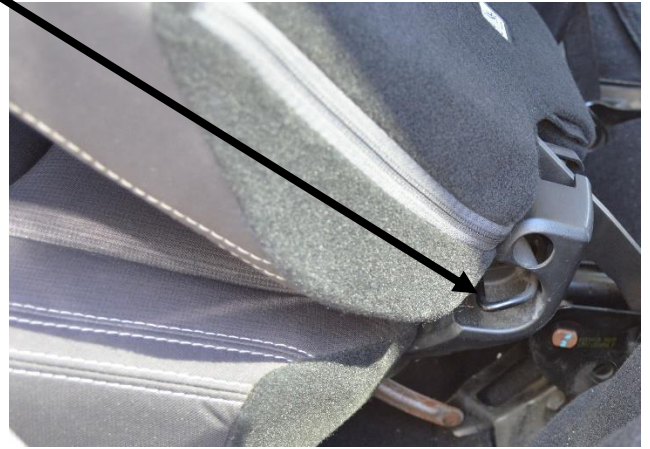

Run middle strap along the side through the d-ring. (Do not use the hook if you are using the d-ring)

For Installation with a Soft Top, insert strap with hook attached to the hole where the hard top bolt would normally be inserted.

Next, take the bottom strap and bring it to the side corner of the rear seats, and insert through the loop that is there, take the strap back to the buckle and secure.

Do not pull the bottom 2 buckles too tight. Adjust all around and tighten, then insert excess straps through the slip keepers.
